

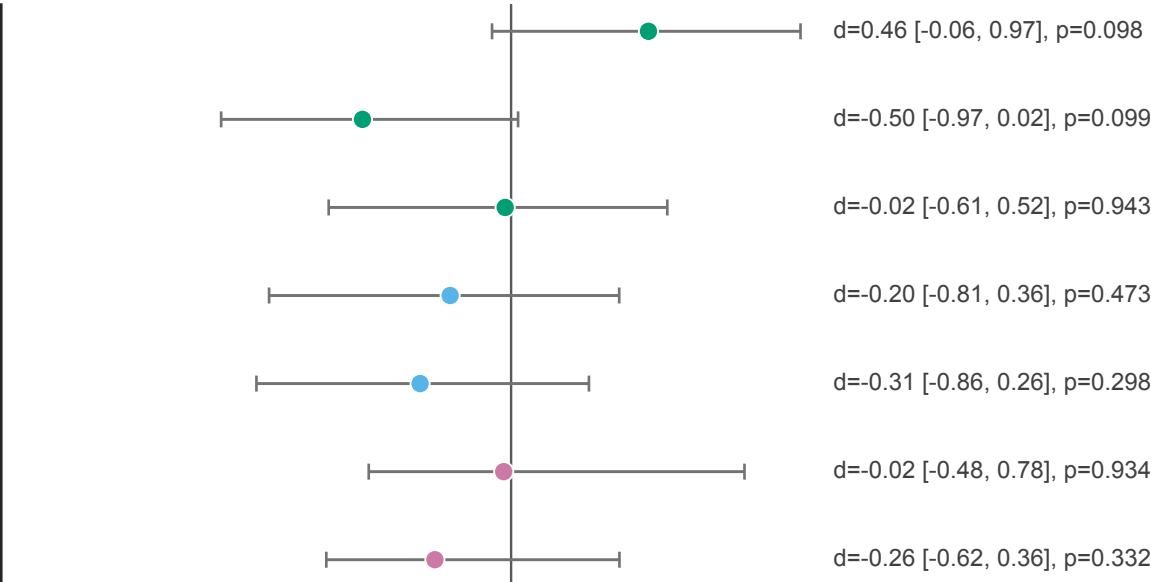

Figure S2. Secondary supportive evidence for Aim 2

SAD HC

A

Safety-background distance
d(CSS, CS-)
Threat-background distance
d(CSR, CS-)
Threat-safety distance
d(CSR, CSS)
Prototype CSS certainty
Prototype CSR certainty
Safety trajectory slope
Threat trajectory slope

Secondary metric summary

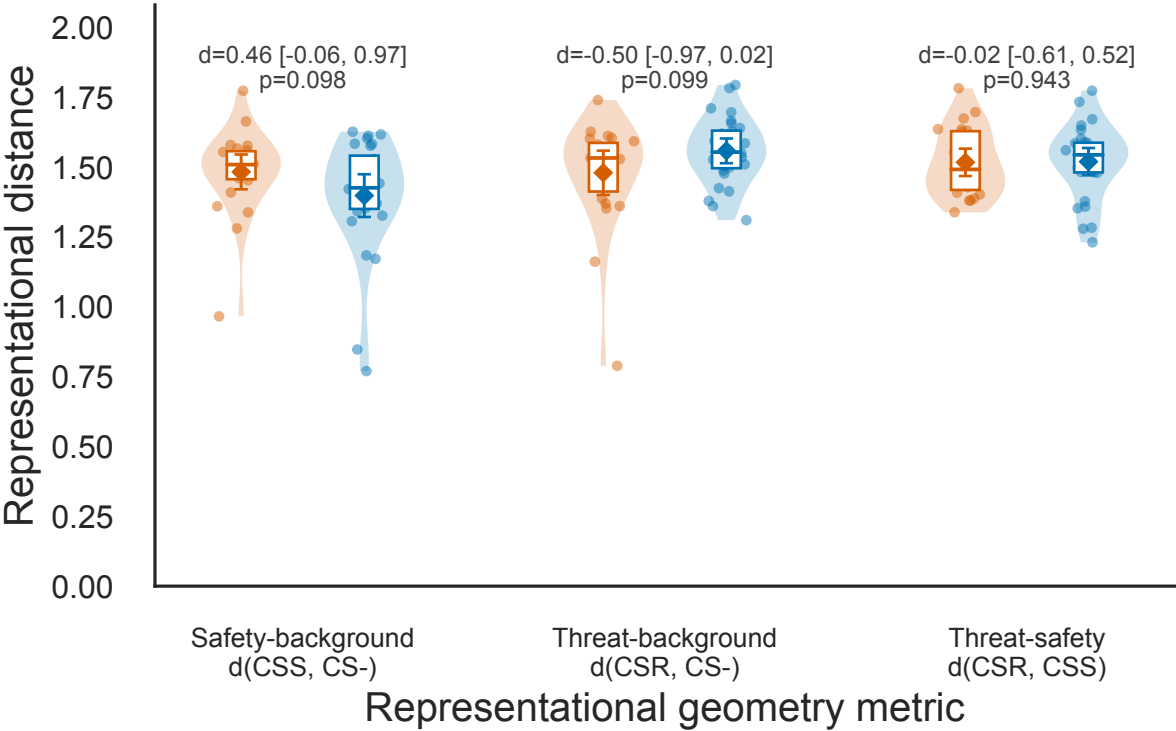

Standardized SAD-HC difference (Cohen's d)

Only metrics with valid SAD and HC observations are shown. Positive values indicate higher values in SAD than HC.

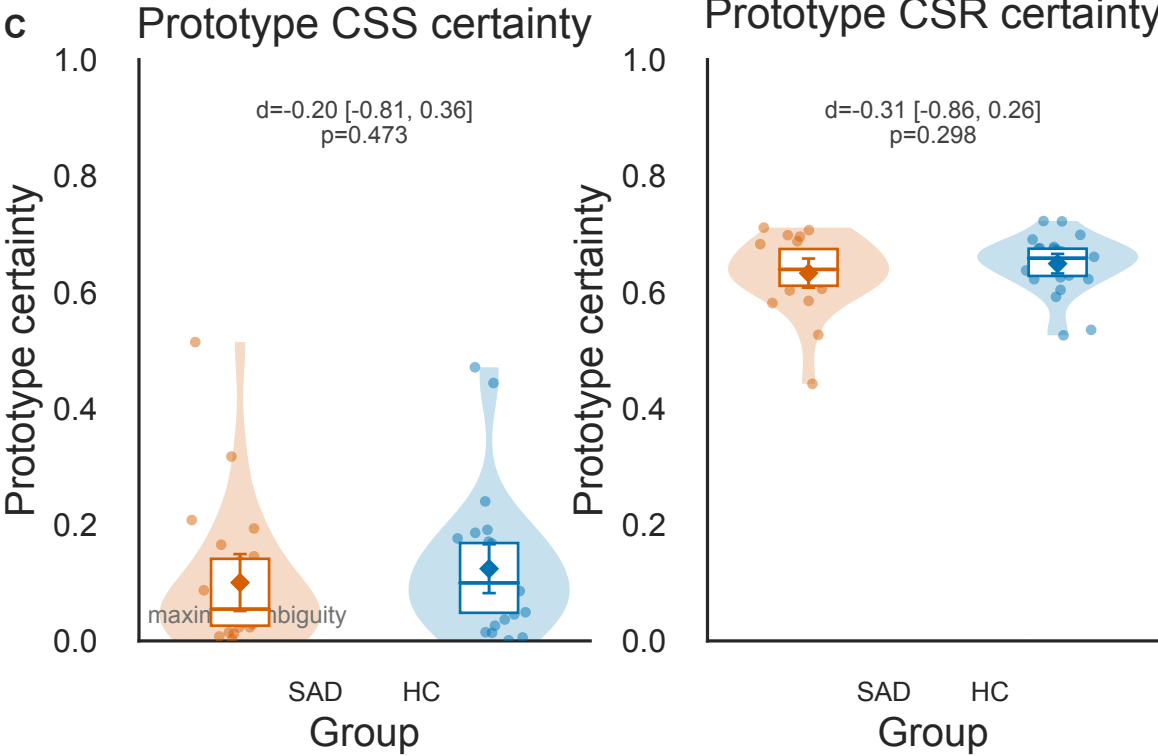

B

Representational geometry components

Decision certainty support

c

Phase-specific learning trajectories

D
